

Directions to Speed Friending Courtesy of Gamma Xi, Area IX

Room Arrangement: Set tables up in a row or in a horseshoe shape. One person sits on either side of the tables so everyone has a face partner.

Directions: Each person is given the Speed Friending questions. Person A asks person B questions from the paper and person B has 90 seconds to answer. Then, person B asks person A questions from the paper and person A has 90 seconds to answer. Then one side of the table rotates clockwise while the other side of the table stays in their seats. The game continues until all people on side B of the table have rotated to talk with all the people on side A of the table. Gamma Xi tried to sit veteran members on the outside (non-moving side) of the table and our newer members on the inside of the table so the new members rotated and got a chance to meet the veteran members.
